Paulo Products Company Names Production Manager

St Louis, MO – July 18, 2011-- Paulo Products Company is pleased to announce the placement of Mr. Aaron Bell as Production Manager of its St. Louis facility. One of the largest and best equipped heat treating plants in the Midwest, Paulo – St Louis offers production heat treating in batch and in continuous belt as well as vacuum heat treating to NADCA requirements. The St Louis facility also provides brazing, induction hardening, aluminum heat treating, cryogenics, blasting, and black oxide services.

Aaron joined Paulo in 2010 after working at Sauer-Danfoss, Inc. where he held positions including: Design Engineer, Quality Engineer, Six Sigma Project Manager, Tactical Buyer, & Strategic Purchasing Manager. Since joining Paulo, Aaron has served as Operations Support Manager providing leadership for specific improvement activities at all Paulo plants.

Aaron is a graduate of Iowa State University where he earned a BS degree in Agricultural Engineering (Power & Machinery focus).

“Aaron’s experience in lean manufacturing and creating customer satisfaction will strengthen the St. Louis facility’s continuous improvement efforts” states Greg Gleib, Vice President, Operations, Paulo Products Company.

Paulo Products Company offer a wide variety of heat treating, brazing and metal finishing solutions as well as a broad range of metallurgical and engineering services. In addition to the St Louis facility, Paulo operates plants in Kansas City, MO, Nashville and Murfreesboro, TN, and Willoughby, OH.
